@

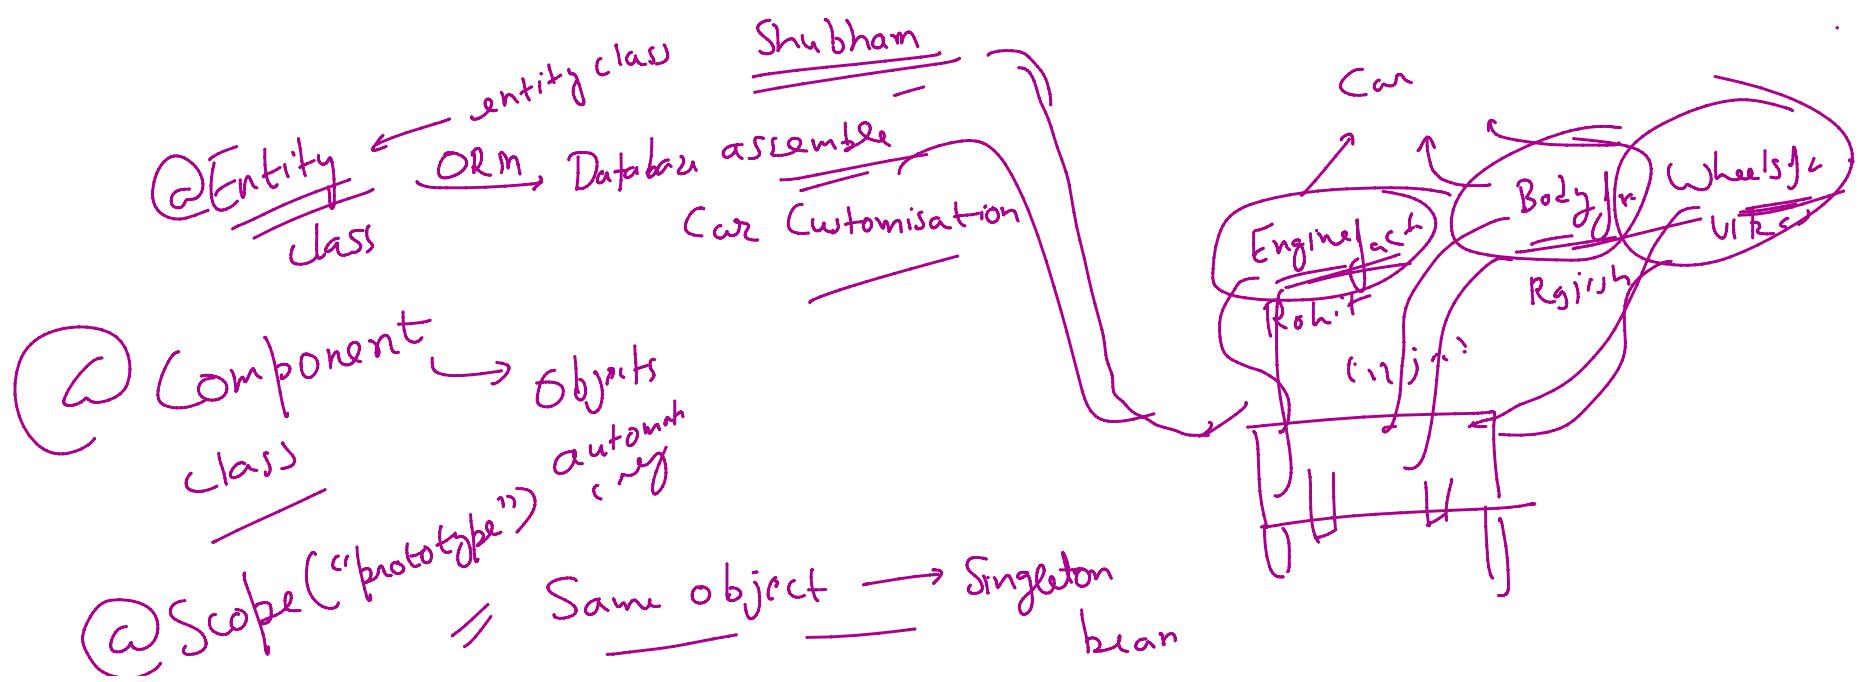

Spring instances / objects → Spring beans

dependency injection

+ toppings

@Scope " == Same object " or bean

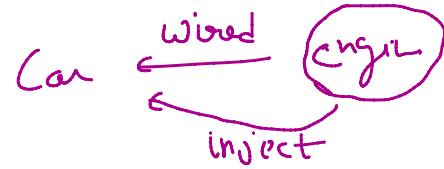

## factory beans

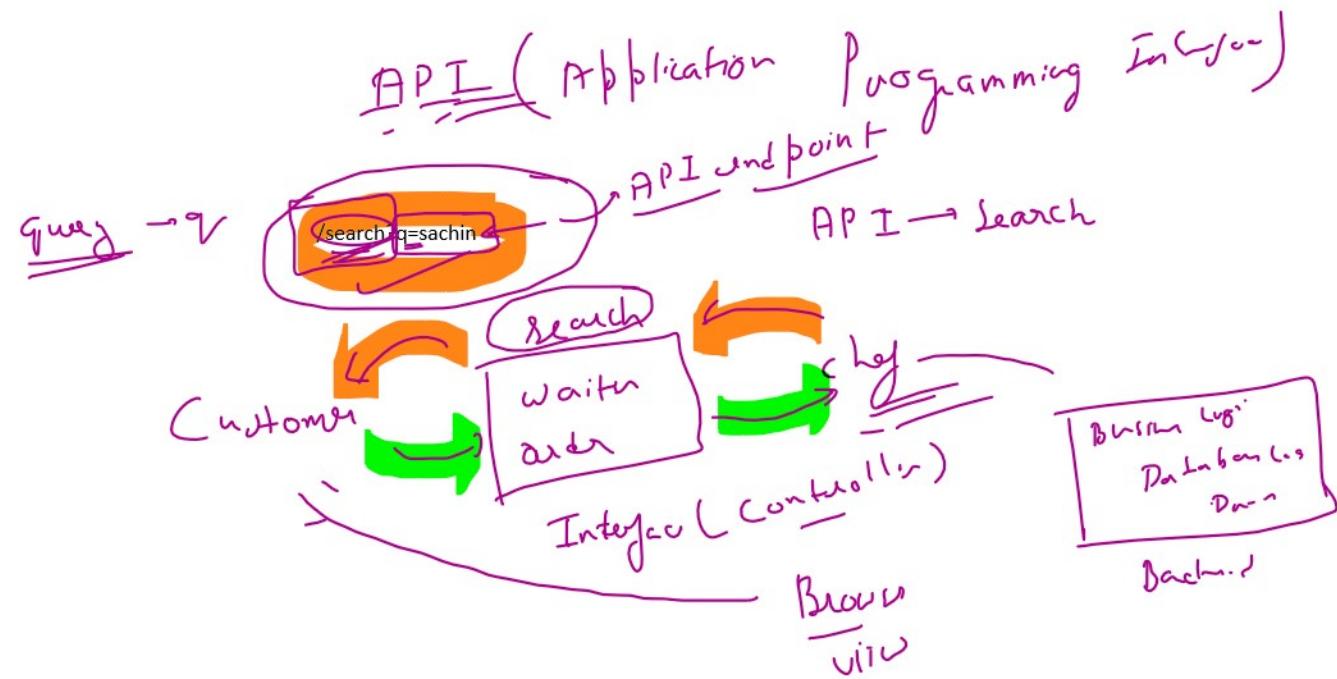

Car  
  └ engine

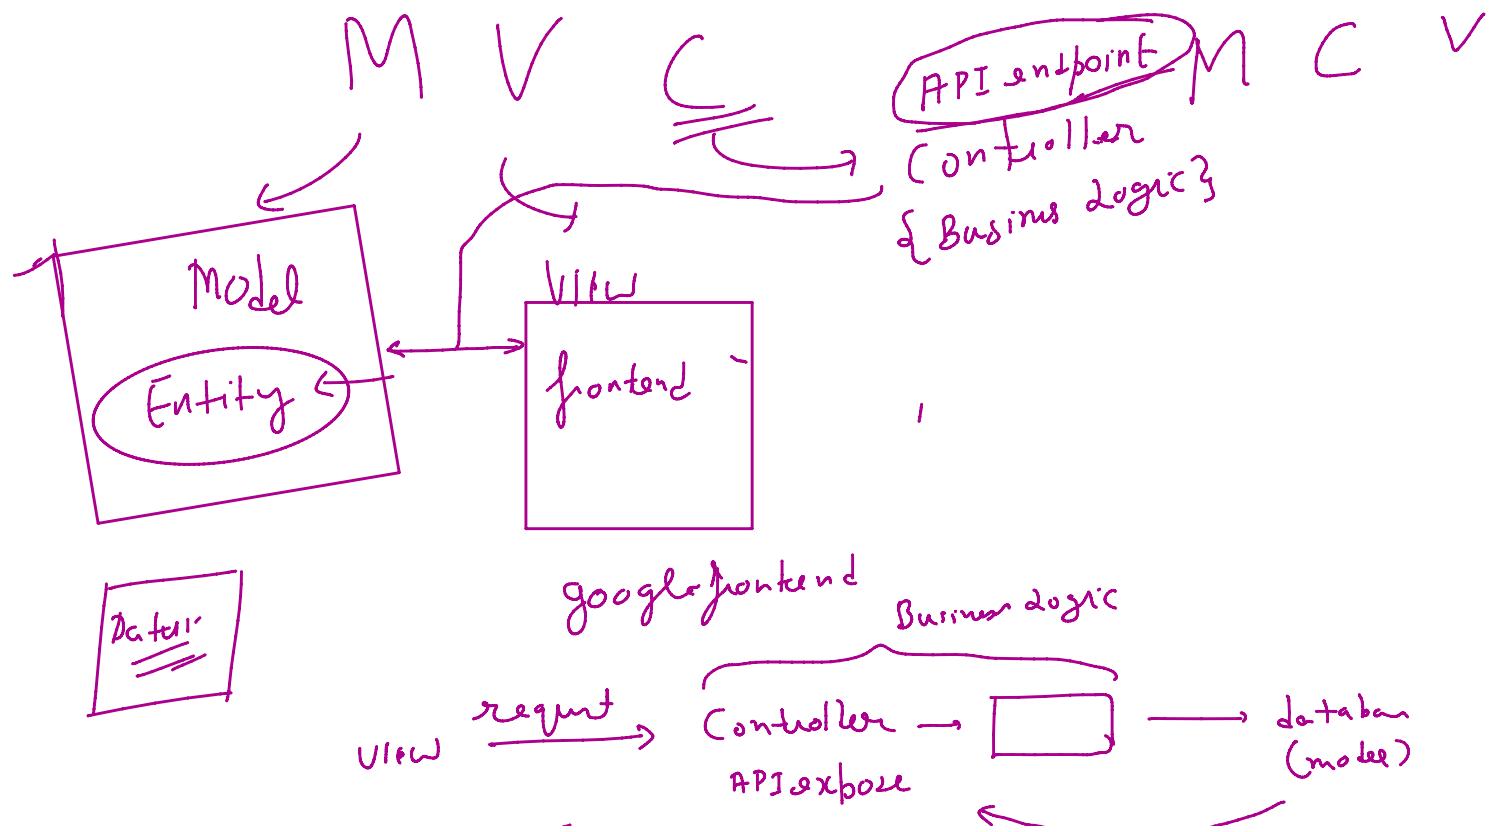

- └ @ Component
- └ @ Scope ("prototype") ↗ diff objects every time
- └ @ Scope ("singleton") ↗ same object creation

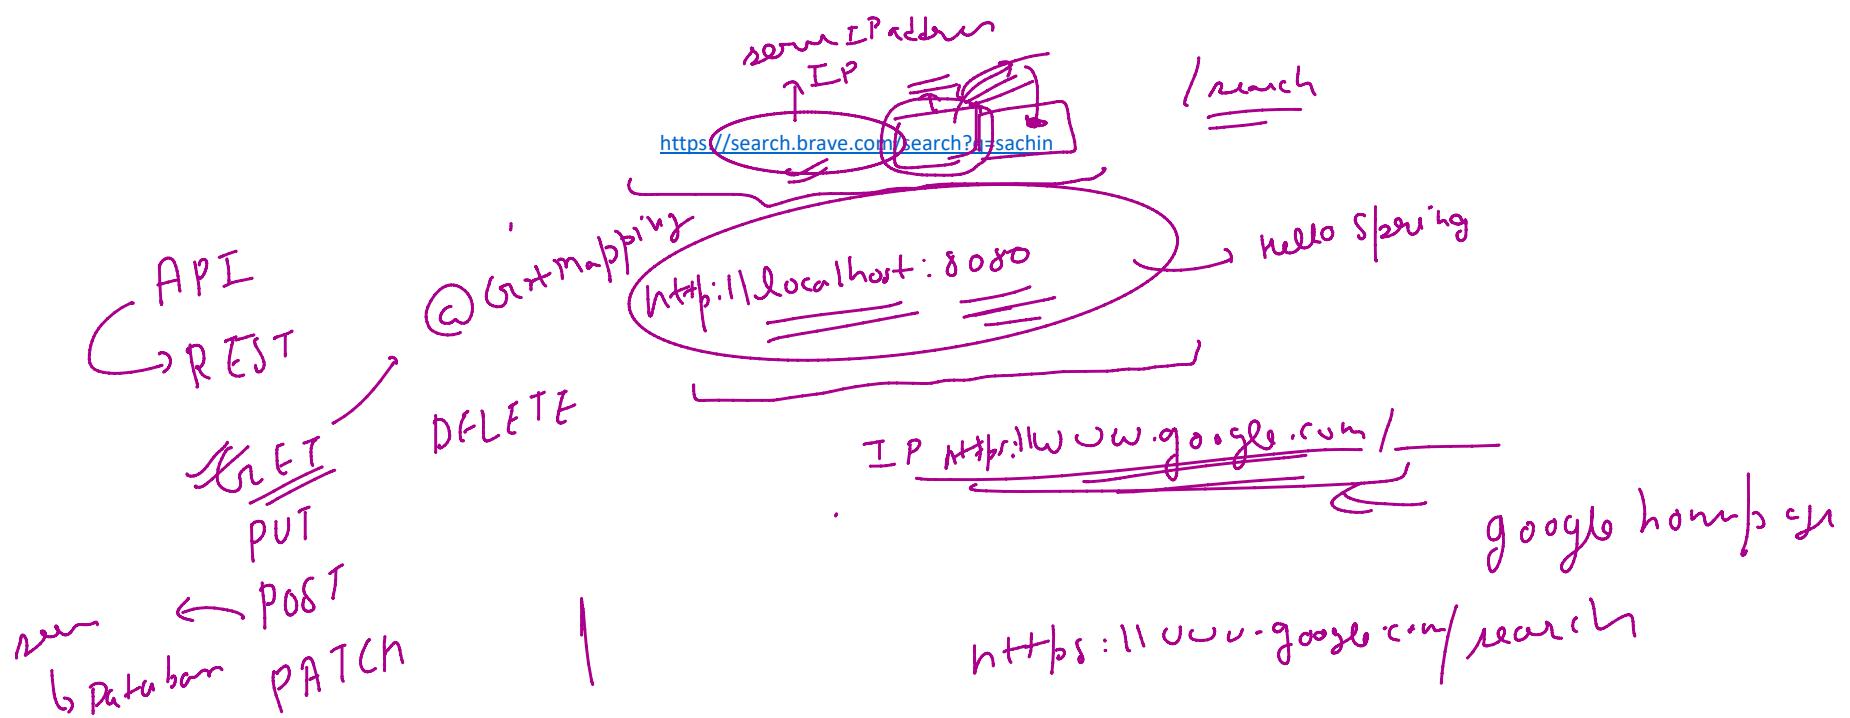

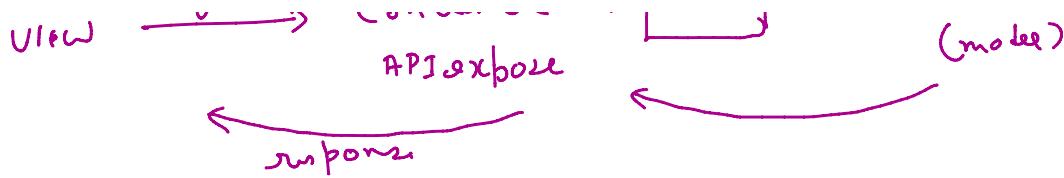

## dependency injection

└ @ Autowired

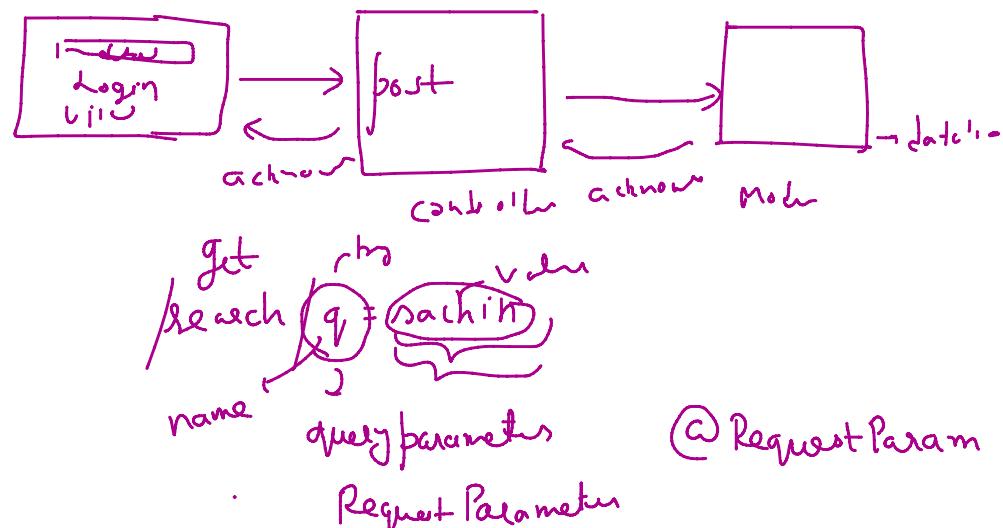

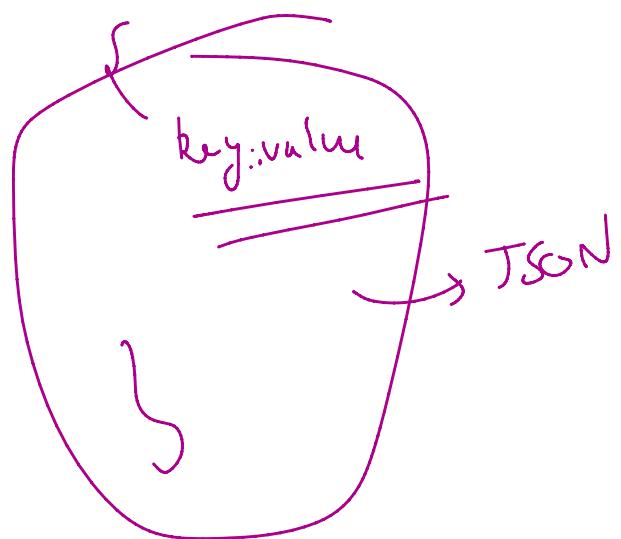

Class → Rest Controller

@RestController

/search ? q = sachin Request Param  
/search/sachin Path variable @ Pathvariable

/search ? kontik = value (sachin)  
/search/kontik

Post → @Post Mapping
